Education

Central Washington University, Ellensburg, WA

Bachelor of Science in Computer Science

June 2025

Relevant Coursework: Data Structures, Cyber Security, Computer Networking, Advanced Software Engineering, Algorithms, Principles of Language Design II, Database Management

Experience

CyberDefense.AI, Remote

Software Development Engineer Intern

August 2024 – Present

- Developed a graph integrity validation tool using Memgraph and Flask, ensuring consistency in distributed Cloud API systems which led to finding inconsistencies in data up to 15% quicker.
- Performed API penetration testing of internal and client tools to identify and fix vulnerabilities, contributing to improved product security.
- Led a team of 4 interns from India in a research project regarding Cloud API System analytics for the CEO, directly affecting future projects.

Medal.tv, Remote

Software Development Engineer Intern

May 2021 – August 2022

- Engineered the integration of Medalbot with Discord, enhancing scalability and performance of Medal's social platform by enabling content upload/viewing, leading to a 10% increase in engagement platform-wide.
- Collaborated with CTO on specifications and evolving product requirements for MedalBot.
- Managed bot deployment and addressed bugs and issues for both main and beta builds.

Projects

VR Keyboard Research (Capstone Project)

C Sharp, Unity, Mathematica, Xcode, Google Raycast API

- Built an iOS/Android virtual reality keyboard app using Unity and deprecated Google Cardboard tech based on client requirements.
- Implemented scripts to share/transfer files natively through email, Airdrop, Google Drive, etc., in a VR environments.
- Created .csv and .txt files to save layout, input methods, keystroke timestamps, and final user text.

PassBook

Python, Tkinter, cryptography.fernet, MySQL

- Built a GUI password generator based on user-defined input (length, characters, etc.).
- Used Fernet encryption to securely store credentials specific to each user.

Technical Skills

Languages: Java, Python, C/C++, C Sharp, MySQL, Spring Boot, REST API

Tools/Frameworks: Flask, JUnit, Docker, VS Code, IntelliJ, Eclipse, NetBeans, WSL, Memgraph, Cloud Servies, Agile Practices, Linux, Docker, Git, Agile, Scrum, JSON, XML
