Technical Skills

Languages: Java, Python, C/C++, C#, SQL

Backend: REST APIs, Spring Boot, Flask

Data: Relational Databases (MySQL/PostgreSQL), NoSQL/Graph (Memgraph)

Testing: JUnit, API smoke testing (curl/bash)

DevOps/Tools: Git, GitHub Actions (CI/CD), Docker, Linux, WSL, VS Code, IntelliJ

Other: Object-Oriented Programming, Multi-threaded Programming, Design Documentation, Cloud APIs, JSON, XML, Agile/Scrum

Experience

CyberDefense.AI, Remote

Software Development Engineer Intern

August 2024 – Present

- Built a graph integrity validation service (Flask, Memgraph) that reconciles Cloud API sources vs. stored asset relationships to detect missing nodes/edges and inconsistent state.
- Performed security testing on internal and client-facing tools; documented findings, supported remediation, and verified fixes.
- Led a 4-person intern team on Cloud API analytics research; delivered a written summary and recommendations to engineering leadership.

Medal.tv, Remote

Software Development Engineer Intern

May 2021 – August 2022

- Integrated MedalBot with Discord to enable content upload/viewing; improved scalability and contributed to a 10% platform-wide engagement increase.
- Partnered with the CTO to define specs and iterate on requirements; owned deployment and production bug triage across main/beta builds.

Projects

Cloud Graph Validator

github.com/ChauAry21/GraphValidator

Java, Spring Boot

- Proof of concept for work at CyberDefense.AI.
- Wrote a python based project to validate the integrity of a graph database from cloud in comparison to the Memgraph version using checksum.
- Test cases for graph being successfully validated and finding a discrepancy written using flask with mock JSON data

Loyalty App Backend

(Private Project)

Java, Spring Boot

- Built a backend service with REST endpoints for businesses, locations, customers, and visit tracking; added idempotent request handling for safe retries.
- Wrote a repeatable smoke test script (bash/curl) for local API validation.

MoneyMate

github.com/ChauAry21/MoneyMate

Java

- Built a personal finance tracker with auth, expense CRUD, and reporting; persists data to a relational database.

Jobright Job Scraper

github.com/ChauAry21/Jobright_Job_Scraper

Python, Playwright

- Automated job recommendation retrieval via authenticated session state + API calls; exported structured results to JSON.
- Integration test in a local server environment.
- Containerized scraper and shipped tagged releases with GitHub Releases and Docker image (GHCR) to simplify installs and reproducible runs.

Education

Central Washington University, Ellensburg, WA

Bachelor of Science in Computer Science

September 2021 - June 2025
